From: hpe-global.travel@hpe.com

Hotel Booking Policy

Please disregard this message if you made your hotel reservation at a different time from your air via CWT or if you have multiple air tickets for this trip.

Dear <Name of Employee>,

You recently booked a trip (referenced below) which contains an overnight stay at your destination but does not reflect your lodging accommodations. HPE Policy states that travelers are required to book all reservations, including lodging, through HPE Travel resources and are required to select the lowest cost, HPE approved property that meets your business needs.

We ask that you book an HPE approved hotel now under your existing air travel reservation via using SmartTravel. If you are outside the HPE intranet, access [SmartTravel](#) via the [CWT Portal](#).

Note: If you are attending a meeting or event that provided accommodations or if you will be staying with a friend/relative, please add your accommodation details to your travel records. Doing so will allow us to reach you more quickly in an emergency.

To add your accommodation details through SmartTravel, under "Upcoming Trips" click on the trip in question and select the option to "Add User Supplied Hotel". If you have difficulties adding the information, please [contact CWT](#) and a travel counselor will add your lodging information to your existing air booking.

We appreciate your cooperation as well as your adherence to HPE's [Global Travel Policy](#)
